

**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

**In the Claims**

Claims 1 and 21 have been amended as follows.

1. A nail file, comprising a body, said body comprising first and second sides, first and second edges, a first end, and at least one abrading surface, said abrading surface comprising at least one surface selected from the group consisting of an acid-etched surface and a sanded surface, wherein said body, first and second sides, first and second edges, first end, and said at least one abrading surface are formed of a single, integral stratum, said integral stratum comprising glass.

21. A method for making a nail file, comprising the steps of:

roughening a glass body so as to produce at least one abrading surface, said roughening comprising at least one operation selected from the group consisting of acid-etching and sanding.
